Paper Title (use style: paper title)

Subtitle as needed

Submitted for Blind Review (DO NOT ADD AUTHORS NAME IN BLIND REVIEW SUBMISSION)

Abstract—This electronic document is a “live” template. The various components of your paper [title, text, heads, etc.] are already defined on the style sheet, as illustrated by the portions given in this document. DO NOT USE SPECIAL CHARACTERS, SYMBOLS, OR MATH IN YOUR TITLE OR ABSTRACT. (Abstract)

Keywords-component; formatting; style; styling; insert (key words)

I. INTRODUCTION (HEADING 1)

All manuscripts must be in English. These guidelines include complete descriptions of the fonts, spacing, and related information for producing your proceedings manuscripts. Please follow them and if you have any questions, direct them to the production editor in charge of your proceedings at Conference Publishing Services (CPS): Phone +1 (714) 821-8380 or Fax +1 (714) 761-1784.

This template provides authors with most of the formatting specifications needed for preparing electronic versions of their papers. All standard paper components have been specified for three reasons: (1) ease of use when formatting individual papers, (2) automatic compliance to electronic requirements that facilitate the concurrent or later production of electronic products, and (3) conformity of style throughout a conference proceedings. Margins, column widths, line spacing, and type styles are built throughout a conference proceedings. Margins, column widths, line spaces, and text fonts are prescribed; please do not alter them. You may note peculiarities. For example, the head margin in this template measures proportionately more than is customary. This measurement and others are deliberate, using specifications that anticipate your paper as one part of the entire proceedings, and not as an independent document. Please do not revise any of the current designations.

IV. PREPARE YOUR PAPER BEFORE STYLING

Before you begin to format your paper, first write and save the content as a separate text file. Keep your text and graphic files separate until after the text has been formatted and styled. Do not use hard tabs, and limit use of hard returns to only one return at the end of a paragraph. Do not add any kind of pagination anywhere in the paper. Do not number text heads—the template will do that for you.

Finally, complete content and organizational editing before formatting. Please take note of the following items when proofreading spelling and grammar:

A. Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have been defined in the abstract. Abbreviations such as IEEE, SI, MKS, CGS, sc, dc, and rms do not have to be defined. Do not use abbreviations in the title or heads unless they are unavoidable.

B. Units

- Use either SI (MKS) or CGS as primary units. (SI units are encouraged.) English units may be used as secondary units (in parentheses). An exception would be the use of English units as identifiers in trade, such as 3.5-inch disk drive.
- Avoid combining SI and CGS units, such as current in amperes and magnetic field in oersteds. This often leads to confusion because equations do not balance dimensionally. If you must use mixed units, clearly state the units for each quantity that you use in an equation.
- Do not mix complete spellings and abbreviations of units: newtons/m2 or N/m2, not N/m^2. Spell out units when they appear in text: a few henries not H. Use a zero before decimal points: 0.25 not .25.
C. Equations

The equations are an exception to the prescribed specifications of this template. You will need to determine whether or not your equation should be typed using either the Times New Roman or the Symbol font (please no other font). To create multileveled equations, it may be necessary to treat the equation as a graphic and insert it into the text after your paper is styled.

Number equations consecutively. Equation numbers, within parentheses, are to position flush right, as in (1), using a right tab stop. To make your equations more compact, you may use the solidus ( / ), the exp function, or appropriate exponents. Italicize Roman symbols for quantities and periods when they are part of a sentence, as in

\[ \alpha + \beta = \gamma. \]  

(1)

Note that the equation is centered using a center tab stop.

D. Some Common Mistakes

- The word \textit{flata\(\text{is}\) plural, not singular.}
- The subscript for the permeability of vacuum \(\mu_0\), and other common scientific constants, is zero with subscript formatting, not a lowercase letter \(\text{lu}\).
- In American English, commas, semi-colons, periods, question and exclamation marks are located within quotation marks only when a complete thought or name is cited, such as a title or full quotation. When quotation marks are used, instead of a bold or italic typeface, to highlight a word or phrase, punctuation should appear outside of the quotation marks. A parenthetical phrase or statement at the end of a sentence is punctuated outside of the closing parenthesis (like this). (A parenthetical sentence is punctuated within the parentheses.)
- A graph within a graph is an \textit{Inset} not an \textit{Insert}.
  The word alternatively is preferred to the word \textit{alternately} (unless you really mean something that alternates).
- Do not use the word \textit{essentially} to mean \textit{approximately} or \textit{effectively}.
- In your paper title, if the words \textit{that uses} can accurately replace the word \textit{using} capitalize the \textit{u} if not, keep using lower-cased.
- Be aware of the different meanings of the homophones \textit{henceforth} and \textit{hence} \textit{complement} and \textit{complement} \textit{principal} and \textit{principal}.
- Do not confuse \textit{imply} and \textit{infer}.
- The prefix \textit{flon\text{is}} not a word; it should be joined to the word it modifies, usually without a hyphen.
- There is no period after the \textit{et\text{al.}} in the Latin abbreviation \textit{et al.}\(\text{.}\)
- The abbreviation \textit{f.e.\text{.}} means \textit{figure} \textit{is\text{.}} and the abbreviation \textit{e.g.\text{.}} means \textit{example}\(\text{.}\)

An excellent style manual for science writers is [7].

V. Using the Template

After the text edit has been completed, the paper is ready for the template. Duplicate the template file by using the Save As command, and use the naming convention prescribed by your conference for the name of your paper. In this newly created file, highlight all of the contents and import your prepared text file. You are now ready to style your paper.

A. Authors and Affiliations

The template is designed so that author affiliations are not repeated each time for multiple authors of the same affiliation. Please keep your affiliations as succinct as possible (for example, do not differentiate among departments of the same organization). This template was designed for two affiliations.

1) For author/s of only one affiliation (Heading 3): To change the default, adjust the template as follows.

a) Selection (Heading 4): Highlight all author and affiliation lines.

b) Change number of columns: Select Format > Columns > Presets > One Column.

c) Deletion: Delete the author and affiliation lines for the second affiliation.

2) For author/s of more than two affiliations: To change the default, adjust the template as follows.

a) Selection: Highlight all author and affiliation lines.

b) Change number of columns: Select Format > Columns > Presets > One Column.

c) Deletion: Delete the author and affiliation lines for the second affiliation.

A graph within a graph is an \textit{Inset} not an \textit{Insert}.
The word alternatively is preferred to the word \textit{alternately} (unless you really mean something that alternates).

For author/s of more than two affiliations:

a) Selection: Highlight all author and affiliation lines.

b) Change number of columns: Select Format > Columns > Presets > One Column.

c) Deletion: Delete the author and affiliation lines for the second affiliation.

A graph within a graph is an \textit{Inset} not an \textit{Insert}.

Be aware of the different meanings of the homophones \textit{henceforth} and \textit{hence} \textit{complement} and \textit{complement} \textit{principal} and \textit{principal}.

Do not confuse \textit{imply} and \textit{infer}.

The prefix \textit{flon\text{is}} not a word; it should be joined to the word it modifies, usually without a hyphen.

B. Identify the Headings

Headings, or heads, are organizational devices that guide the reader through your paper. There are two types: component heads and text heads.
Component heads identify the different components of your paper and are not topically subordinate to each other. Examples include Acknowledgments and References and, for these, the correct style to use is \textit{Heading} 5. Use \textit{figure caption} for your Figure captions, and \textit{table head} for your table title. Run-in heads, such as \textit{Abstract}, will require you to apply a style (in this case, italic) in addition to the style provided by the drop down menu to differentiate the head from the text.

Text heads organize the topics on a relational, hierarchical basis. For example, the paper title is the primary text head because all subsequent material relates and elaborates on this one topic. If there are two or more sub-topics, the next level head (uppercase Roman numerals) should be used and, conversely, if there are not at least two sub-topics, then no subheads should be introduced. Styles named \textit{Heading 1}, \textit{Heading 2}, \textit{Heading 3}, and \textit{Heading 4} are prescribed.

C. Figures and Tables

1) Positioning Figures and Tables: Place figures and tables at the top and bottom of columns. Avoid placing them in the middle of columns. Large figures and tables may span across both columns. Figure captions should be below the figures; table heads should appear above the tables. Insert figures and tables after they are cited in the text. Use the abbreviation \textit{Fig.} 1 even at the beginning of a sentence.

\begin{table}[h]
\centering
\begin{tabular}{|c|c|c|c|}
\hline
Table Head & Table Column Head & Subhead & Subhead \\
\hline
copy & More table copy & Subhead & Subhead \\
\hline
\end{tabular}
\caption{Sample table.}
\end{table}

D. Footnotes

Use footnotes sparingly (or not at all) and place them at the bottom of the column on the page on which they are referenced. Use Times 8-point type, single-spaced. To help your readers, avoid using footnotes altogether and include necessary peripheral observations in the text (within parentheses, if you prefer, as in this sentence).

VI. COPYRIGHT FORMS AND REPRINT ORDERS

You must submit the IEEE Electronic Copyright Form (ECF) per Step 7 of the CPS author kit web page. THIS FORM MUST BE SUBMITTED IN ORDER TO PUBLISH YOUR PAPER.

Please see Step 9 for ordering reprints of your paper. Reprints may be ordered using the form provided as \texttt{reprint.pdf}.

ACKNOWLEDGMENT

(Acknowledgements to be added to camera ready version upon acceptance.)

The preferred spelling of the word \textit{acknowledgment} in America is without an \textit{e} before the \textit{d}. Avoid the stilted expression, \textit{one of us (R.B.G.) thanks . . .}. Instead, try \textit{R.B.G. thanks}.

Put applicable sponsor acknowledgments here: DO NOT place them on the first page of your paper or as a footnote.

REFERENCES

List and number all bibliographical references in 9-point Times, single-spaced, at the end of your paper. When referenced in the text, enclose the citation number in square brackets, for example [1]. Where appropriate, include the name(s) of editors of referenced books. The template will number citations consecutively within brackets [1]. The sentence punctuation follows the bracket [2]. Refer simply to the reference number, as in [3]. Do not use \textit{Ref.} [3] or \textit{Reference} [3] except at the beginning of a sentence: \textit{Ref.} [3] was the first . . .

Number footnotes separately in superscripts. Place the actual footnote at the bottom of the column in which it was cited. Do not put footnotes in the reference list. Use letters for table footnotes.

Unless there are six authors or more give all authors’ names; do not use \textit{et al.} Papers that have not been published, even if they have been submitted for publication, should be cited as \textit{unpublished} [4]. Papers that have been accepted for publication should be cited as \textit{in press} [5]. Capitalize only the first word in a paper title, except for proper nouns and element symbols.

For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [6].

K. Elissa, *Title of paper if known*, unpublished.

R. Nicole, *Title of paper with only first word capitalized*, J. Name Stand. Abbrev., in press.
